Thank you Greg. Recovery is going well if a bit slowly.

The companies are comfortable being made public as participants. The comments we submitted on the document itself (with the comment boxes) are a summary of the comments from the various industry participants and were not attributed to any one company, of course.

Thanks again and have a great weekend.

Subject: Follow up to PtC Pilot Panel Discussion

Mike,

Hope your recovery is going smoothly.

I rec'd your phone message. There is one follow up item. I was asked at the public meeting to identify all eight companies who participated in the pilot study.

We anticipated during our conf call last Thursday that this question could arise. You were going to check with the companies (other than P&G, BASF and Dow) to determine if they were OK with being identified as participants in the pilot study. Were you able to do that and, if so, what did you learn?

Greg Schweer, Chief

New Chemicals Management Branch (MC- 7405M)

U.S. EPA, Office of Pollution Prevention and Toxics
